

## ***SAFETY TIPS***

- ✓ **Have your dryer installed and serviced by a professional.**
- ✓ **Don't operate the dryer without a lint filter. And clean it after every use!**
- ✓ **For venting, use rigid or flexible metal material.**
- ✓ **Gas dryers should be professionally inspected to ensure there are no leaks.**
- ✓ **Never leave a dryer on when you're not home or asleep.**
- ✓ **Do not dry items that have come in contact with flammable materials.**
- ✓ **Keep dryer clear of items that are combustible like boxes and clothes.**
- ✓ **Have a professional inspect your duct work at least once a year to make sure it is clear of debris and nests.**

**If you're unsure, call the professionals at *Quality Vent!***

### ***Why Us?***

We are an owner operated business and take pride in the work we do. You can rest assured we stand by the services we provide our customers.

Quality Vent will treat you and your home with the courtesy and respect we would give our own families.

When we're done, you'll have the satisfaction that the work area is clean and your dryer vents are clear!

## ***Do you answer Yes to any of these?***

- Does your dryer get hot to the touch?
- Is it taking more than one cycle to dry your clothes?
- Do you clean the lint trap, but not the vent?
- Have you had your vent serviced in the past year?

## ***Who can benefit from a Quality Vent dryer vent cleaning?***

- ✓ Single family homes
- ✓ Duplexes
- ✓ Condos
- ✓ Commercial Laundries
- ✓ Anyone with a dryer vent!
- ✓ Townhouses
- ✓ Apartments
- ✓ Beauty Salons

## ***Reduce your risk of fire***

The U.S. Fire Administration (USFA) reports the leading cause of dryer fires is failure to clean the lint as well as improper installation and lack of maintenance.

The accumulation of lint, both in the dryer and in the dryer vent, reduces the airflow and creates a highly flammable fuel source, causing overheating and the potential of fire.

## ***Save \$15-\$30 every month***

A blocked dryer vent can create the need to cycle your clothes 2-3 times to get the clothes dry.

This means upwards of \$2.00/load compared to only 60¢. How many loads of wash do you do a month?

## ***Your dryer will last longer***

When a dirty dryer vent reduces the exhaust airflow, a dryer has to work harder, be run longer, cycle 2-3 times as much and overheats – all reducing the life of your appliance!

## ***Dry clothes faster***

If you have to run your dryer a few times for every load, that's wasting about 1½ hours per wash load!
